

THERMOMELT

Thermomelt has been designed especially for the refrigeration industry to be used as an internal or external drain line heater.

Thermomelt is a fixed length tape, with one metre cold lead, terminated at our factory to ensure completely waterproof terminations. This is a series circuit heating tape which is sheathed in silicone rubber, producing 20 or 40 watts per metre along its entire length.

Available in 1 to 6 metre lengths it has also been used successfully in process heating and temperature maintenance applications.

PRODUCT DATA

Product Ref	Volts ac	Watts/Metre	Heating Zone Length (mm)
STL20/230	220/230	20	1 to 6 mtrs
STL40/230	220/230	40	1 to 6 mtrs

Accessories

- T-Junction
- Sealing End (Silicone rubber)
- Sealing End (Shrink on sleeve)
- Froststat
- Splicers
- Thermostat (pipe/cylinder and capillary)
- Woven Glass Fixing Tape
- Control Panels
